

Westchester County Suggested Project Opportunities

Location	Project Title	Description
Briarcliff Manor	Scarborough Park (Restoration)	Extend/restore existing park to add fishing, rooftop, boating and passive enjoyment of river
Cortlandt	Verplanck Dock	Extend existing fishing pier to accommodate the docking of larger tourist type boats and ferries
Cortlandt	Verplanck-Environmental Education Centre	Create environmental centre to provide an integrative educational experience
Cortlandt	Oscawana and George's Island Parks Resilience Project	Shoreline stabilization, relocated passive recreational features and modification to river access
Cortlandt	Annsville-Invasive Species Eradication and Recreational Access	Eliminate Phragmites in and around Annsville Circle and Annsville Creek Bridge to improve habitat and recreational access. Provide

		pedestrian link to Peekskill
Cortlandt	Oscawana Island Habitat Restoration	Habitat restoration; Phragmites removal
Cortlandt	Furnace Brook Removal Project	Fish passage is blocked by a large dam, removal will allow fish migration to Hudson wetlands
Cortlandt	Indian Point Nuclear Facility	Need to protect facility from damage
Croton	Croton Point Park Seawall Repair	Repair seawall damaged from storms
Croton	Croton Point Park Wetland Restoration	Large wetland could be restored, expanded, and protected from sea level rise and future storms to improve functional value for fishing and wildlife habitats
Croton	Croton Point Park Landfill Meadow Restoration	Restore meadow to functionally viable habitat for migrating and other birds in important flyway
Croton-on-Hudson	Croton Elliott Way Sidewalk Roadway Improvement	Widen narrow access road to Croton Landing Park
Croton-on-Hudson	Croton Marsh and Estuary Restoration	Croton marsh is the most abused tidal marsh in the Hudson due to landfill and Metro-North. Should be carefully assessed along with adjoining estuary
Dobbs Ferry	Public Access Adjacent to Village Waterfront Park	Obtain access to privately owned property to enhance public access to waterfront
Hastings-on-Hudson	Recreational River Access	Create kayaking, boating and fishing access to river as part of shoreline restoration

Please note: Inclusion of a project on the county list is not an indication that the project has been fully reviewed for meeting selection criteria, nor is it a guarantee that it will be included in the Hudson River Comprehensive Restoration Plan.

Hastings-on-Hudson	Shoreline Stabilization and Restoration	Cleanup of site is nearing second phase. Shoreline engineering for habitat access and resiliency.
Hastings-on-Hudson	Planning Waterfront Integration with Village Downtown	Planning process for tying in waterfront development with village land on east side of Metro-North tracks
Irvington	Scenic Hudson and Mathessen Parks	Two municipal parks that provide access to the river and provide recreation opportunities
Irvington	Bridge Street Plaza	Converted industrial buildings now office/restaurant space vulnerable to flood/storm inundation
Mt. Pleasant	Culvert Construction and Bridge Under Metro-North	Problematic culvert and trestle being compromised
Ossining	Water Recreation at Waterfront Spray Park	Spray Park recreation system with grant monies from Senator Carlucci
Ossining	Ossining Boat and Cove Club	Working club within a town park
Ossining	Kenny's Cove	Body of water on East side of tracks
Ossining	Beach Access	Re-establish swim access to river at waterfront park
Ossining	Sedimentation Removal	Reconfigure marina depth to permit recreational and itinerant boat access
Ossining	MTA/Village of Ossining Culvert Cleaning Project	MTA subcontractor removed all rubble below existing train tracks
Ossining	Sing Sing Historic Prison Museum	Develop destination prison museum on Ossining waterfront adjacent to Ossining Correctional Facility

Please note: Inclusion of a project on the county list is not an indication that the project has been fully reviewed for meeting selection criteria, nor is it a guarantee that it will be included in the Hudson River Comprehensive Restoration Plan.

Ossining	Deep Water Access	Deep water access to waterfront for tourism and ferry service to Haverstraw and Manhattan
Ossining	Re-construct Sanitary Sewer Line and Develop Walking Trail	Replace leaky sanitary sewer along Kill Brook and top with walk way to waterfront
Ossining	Sedimentation Removal	Marina depth and removal of old barges
Ossining	Crawbuckie Park Connection	Connect Crawbuckie Park to waterfront via easement through private property
Ossining	Boathouse Restoration and Flood Raise	Raise restaurant 6-8' on pillars, improve parking
Ossining	Dock Extension	Dock extension to avoid future dredging of existing structures caused by large boats
Ossining	Dock/Wave Attenuator	New floating dock and wave attenuator system to provide large boats dock space
Ossining	Swimming and Kayak Beach	Yacht Club encourages swimming and kayaking from our beach
Ossining	Access Over Railroad Tracks to Sparta Dock/Park	Railroad tracks are major barrier to access Sparta dock/park. A pedestrian bridge would allow access
Ossining	Access Over Railroad Tracks to Engel Park	Accessibility improvement is necessary to waterfront including Engel Park
Ossining	Wastewater Treatment Plant Vulnerability Assessment	Studies were done to develop cost effective options to avoid plant

Please note: Inclusion of a project on the county list is not an indication that the project has been fully reviewed for meeting selection criteria, nor is it a guarantee that it will be included in the Hudson River Comprehensive Restoration Plan.

		inundation from storm surge
Ossining	Re-construct Sanitary Sewer Line and Develop Walking Trail	Replace leaky sanitary sewer along Kill Brook and top with walk way to waterfront
Peekskill	Fleishman's Pier Repairs	Existing pier is 300' long, support structure needs structural work and draft
Peekskill	Peekskill Marina	Sedimentation removal enabling the proper operation of almost half of the marina
Peekskill	McGregory Brook	Contributes to pollution/sedimentation caused by large tributary area of paved roadways and parking lots
Peekskill	Proposed Pipeline Crossing	Proposed pipeline would cross several wetland areas along Dickey Brook, on private property
Peekskill	Wastewater Treatment Plant Vulnerability Assessment	Studies were done to develop cost effective options to avoid plant inundation from storm surge
Sleepy Hollow	Philipse Manor Beach Club	Recreation, privately owned
Sleepy Hollow	Philipsburg Manor Dam	Phillips Manor wants/needs to rebuild their walk-bridge over the dam
Sleepy Hollow	Devries Village Park	Village might want to dredge Pocantico River along Devries Park because the park and ball field floods, bridge construction, phragmites invasion
Sleepy Hollow	Riverwalk-Kingsland Point Park	Village or county soften the edge of

Please note: Inclusion of a project on the county list is not an indication that the project has been fully reviewed for meeting selection criteria, nor is it a guarantee that it will be included in the Hudson River Comprehensive Restoration Plan.

		the river- restoration
Sleepy Hollow	Lighthouse Restoration	Base is being compromised
Sleepy Hollow		Natural wetland
Sleepy Hollow		Protected wetlands
Sleepy Hollow	Pocantico-mouth of river, Kingsland Point Park	Pocantico River mouth is constricted, goes under Metro-North and maybe a rock fish ladder
Sleepy Hollow	Philipsburg Manor Dam	Eel ladder and/or fish ladder at dam
Sleepy Hollow	Devries Village Park	Village might want to dredge Pocantico River along Devries Park because the park and ball field floods, bridge construction, phragmites invasion
Sleepy Hollow	Riverwalk-Kingsland Point Park	Village or county soften the edge of the river- restoration
Sleepy Hollow		Catch basin and culvert
Sleepy Hollow		Bridge and spillway infrastructure failing at Freemont Pond
Sleepy Hollow	Pocantico-mouth of river, Kingsland Point Park	Pocantico River mouth is constricted, goes under Metro-North and maybe a rock fish ladder
Tarrytown	Tarrytown Waterfront	Mixed use residential/commercial/recreational area built above flood levels
Yonkers	Habershaw Park	Restoration of tidal wetlands and provision of ecological education and outreach opportunities
Yonkers	Wastewater Treatment Plant Vulnerability Assessment	Studies were done to develop cost-effective options to avoid plant

Please note: Inclusion of a project on the county list is not an indication that the project has been fully reviewed for meeting selection criteria, nor is it a guarantee that it will be included in the Hudson River Comprehensive Restoration Plan.

		inundation from storm surge
Westchester	Research Access Station/Facility	Network of research access stations
Westchester	Sediment Management to Benefit Habitat and Recreation	Better manage sediment and plan restoration and access
Westchester	Freemont Pond	Storm retention needs dam spillway

Please note: Inclusion of a project on the county list is not an indication that the project has been fully reviewed for meeting selection criteria, nor is it a guarantee that it will be included in the Hudson River Comprehensive Restoration Plan.
